

## FlatRound™ Wire Brush Press Release

MADI has introduced the FlatRound™ Wire Brush. The most innovative wire brush for Transmission, Substation and Distribution ever launched.

The FlatRound™ Wire Brush encourages linemen to brush because it is uniquely designed to make wire brushing easier and more convenient than ever. The FlatRound™ has two designed brushing surfaces, one side for flat connections and the other for round connections.

The flat wire brush can be used on any flat surface, such as flat pads on the pad-mounted transformer, hylugs and all cable to flat connectors. In Transmission applications, the flat side can also be used on all dead-end single-tongue and jumper-terminal connectors and in Substation applications it can be used on all terminal connections up to 1000 MCM.

The round wire brush covers conductors up to 1590 MCM. This covers most conductors and both wire brushes are easily replaceable.

The FlatRound™ Wire Brush is durable, lightweight (weighs less than ½ pound) and is made of non-conductive material. The design of this tool eliminates lineman hand and leg discomfort currently experienced with other wire brushes. The built-in snap ring makes it easy to store on belts or in bucket trucks.

Properly brushing all types of connections helps decrease outages and bad connections therefore generating significant savings for Utilities.

*Catalog #: FRWB-1 (FlatRound™ Wire Brush)*

*Catalog #: LWB-1 (Large Wire Brush Replacement)*
